SAFETY

	The lightning flash with arrow head within an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.
	The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Please follow all warnings, precautions and maintenance as recommended in this user's guide.

Important safety instructions

- Do not block any ventilation openings. To ensure reliable operation of the projector and to protect from over heating, it is recommended to install the projector in a location that does not block ventilation. As an example, do not place the projector on a crowded coffee table, sofa, bed, etc. Do not put the projector in an enclosure such as a book case or a cabinet that restricts air flow.
- To reduce the risk of fire and/or electric shock, do not expose the projector to rain or moisture. Do not install near heat sources such as radiators, heaters, stoves or any other apparatus such as amplifiers that emits heat.
- Do not let objects or liquids enter the projector. They may touch dangerous voltage points and short out parts that could result in fire or electric shock.
- Do not use under the following conditions:
 - In extremely hot, cold or humid environments.
 - (i) Ensure that the ambient room temperature is within 0°C ~ 40°C
 - (ii) Relative humidity is up to 80%
 - In areas susceptible to excessive dust and dirt.
 - Near any appliance generating a strong magnetic field.
 - In direct sunlight.
- Do not use the unit if it has been physically damaged or abused. Physical damage/abuse would be (but not limited to):
 - Unit has been dropped.
 - Power supply cord or plug has been damaged.
 - Liquid has been spilled on to the projector.
 - Projector has been exposed to rain or moisture.
 - Something has fallen in the projector or something is loose inside.
- Do not place the projector on an unstable surface. The projector may fall over resulting in injury or the projector may become damaged.
- Do not block the light coming out of the projector lens when in operation. The light will heat the object and may melt, cause burns or start a fire.
- Please do not open or disassemble the projector as this may cause electric shock.
- Do not attempt to service the unit yourself. Opening or removing covers may expose you to dangerous voltages or other hazards. Please call Optoma before you send the unit for repair.
- See projector enclosure for safety related markings.
- The unit should only be repaired by authorized service personnel.
- Only use attachments/accessories specified by the manufacturer.
- This projector will detect the life of the light source itself.
- When switching the projector off, please ensure the cooling cycle has been completed before

SAFETY

disconnecting power.

- Turn off and unplug the power plug from the AC outlet before cleaning the product.
- Use a soft dry cloth with mild detergent to clean the projector housing. Do not use abrasive cleaners, waxes or solvents to clean the unit.
- Disconnect the power plug from AC outlet if the product is not being used for a long period of time.
- Do not setup the projector in places where it might be subjected to vibration or shock.
- Do not touch the lens with bare hands.
- Remove battery/batteries from remote control before storage. If the battery/batteries are left in the remote for long periods, they may leak.
- Do not use or store the projector in places where smoke from oil or cigarettes may be present, as it can adversely affect the quality of the projector performance.
- Please follow the correct projector orientation installation as non standard installation may affect the projector performance.
- Use a power strip and or surge protector. As power outages and brown-outs can KILL devices.
- Do not look into the projector lens during operation. The bright light may harm your eyes.
- According to the classification of photobiological safety of light sources and light source systems, this product is Risk Group 2, IEC 62471-5:2015.

Trademark recognition

Kensington is a U.S. registered trademark of ACCO Brand Corporation with issued registrations and pending applications in other countries throughout the world.

The terms HDMI, HDMI High-Definition Multimedia Interface, HDMI Trade dress and the HDMI Logos are trademarks or registered trademarks of HDMI Licensing Administrator, Inc.

DLP®, DLP Link and the DLP logo are registered trademarks of Texas Instruments and BrilliantColor™ is a trademark of Texas Instruments.

All other product names used in this manual are the properties of their respective owners and are Acknowledged.

FCC

This device has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

Notice: Shielded cables

All connections to other computing devices must be made using shielded cables to maintain compliance with FCC regulations.

Caution

Changes or modifications not expressly approved by the manufacturer could void the user's authority, which is granted by the Federal Communications Commission, to operate this projector.

Operation Conditions

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference and

SAFETY

2. This device must accept any interference received, including interference that may cause undesired operation.

Notice: Canadian users

This Class B digital apparatus complies with Canadian ICES-003.

Remarque à l'intention des utilisateurs canadiens

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Declaration of Conformity for EU countries

- EMC Directive 2014/30/EU (including amendments)
- Low Voltage Directive 2014/35/EU
- RED 2014/53/EU (if product has RF function)

WEEE

Disposal instructions

Do not throw this electronic device into the trash when discarding. To minimize pollution and ensure utmost protection of the global environment, please recycle it.

Cleaning the lens

- Before cleaning the lens, be sure to turn off the projector and unplug the power cord to allow it to completely cool down.
- Use a compressed air tank to remove the dust.
- Use a special cloth for cleaning lens and gently wipe the lens. Do not touch the lens with your fingers.
- Do not use alkaline/acid detergents or volatile solvents such as alcohol for cleaning lens. If the lens is damaged due to the cleaning process, it is not covered by the warranty.

Warning: Do not use a spray containing flammable gases to remove dust or dirt from the lens. This may cause a fire due to excessive heat inside the projector.

Warning: Do not clean the lens if the projector is warming up as this may cause the lens' surface film to peel off.

Warning: Do not wipe or tap the lens with a hard object.

To avoid electric shock, the unit and its peripherals must be properly grounded (earthed).

INTRODUCTION

Thank you for purchasing an Optoma projector. For full list of features please visit the product page on our website, where you will also find additional information and documentation such as FAQs.

Package overview

Carefully unpack and verify that you have the items listed below under standard accessories. Some of the items under optional accessories may not be available depending on the model, specification and your region of purchase. Please check with your place of purchase. Some accessories may vary from region to region.

The warranty card is only supplied in some specific regions. Please consult your dealer for detailed information.

Standard accessories

Note:

- For access to the setup information, user manual, warranty information, and product updates – please scan the QR Code or visit the following URL:
<https://www.optoma.com/support/download>
- The accessories may vary depending on the region.

INTRODUCTION

Product overview

Note:

- Do not block projector intake and exhaust vents.
- When operating the projector in an enclosed space, allow at least 30 cm clearance around the intake and exhaust vents.

INTRODUCTION

Note:

- *Some buttons may have no function for models that do not support these features.*
- *Before using the remote control for the first time, remove the transparent insulation tape. See page 18 for battery installation.*
- *The inclusion of the battery for the remote control may vary depending on the region.*
- *The remote control may vary depending on the region.*

SETUP AND INSTALLATION

Installing the projector

Your projector is designed to be installed in one of four possible positions.

Your room layout or personal preference will dictate which installation location you select. Take into consideration the size and position of your screen, the location of a suitable power outlet, as well as the location and distance between the projector and the rest of your equipment.

Projector should be placed flat on a surface and 90 degrees / perpendicular to the screen.

- How to determine projector location for a given screen size, please refer to distance table on pages 44~45.
- How to determine screen size for a given distance, please refer to distance table on pages 44~45.

Note: As the projector is moved farther away from the screen, the size of the projected image increases and the vertical offset also increases in proportion.

SETUP AND INSTALLATION

Projector installation notice

- Allow at least 30 cm clearance around the exhaust vent.

- Ensure that the intake vents do not recycle hot air from the exhaust vent.
- When operating the projector in an enclosed space, ensure that the surrounding air temperature within the enclosure does not exceed operation temperature while the projector is running, and the air intake and exhaust vents are unobstructed.
- All enclosures should undergo a certified thermal evaluation to ensure that the projector does not recycle exhaust air, as this may cause the device to shut down even if the enclosure temperature remains within the acceptable operation temperature range.

SETUP AND INSTALLATION

Connecting sources to the projector

No	Item	No	Item
1.	Audio Out cable	5.	USB power cable
2.	HDMI cable	6.	Power adapter
3.	HDMI dongle	7.	Power cable
4.	USB Type C cable		

Note:

- To ensure the best image quality and avoid connection errors, we recommend the use of High Speed or Premium Certified HDMI cables up to 5 meters.

SETUP AND INSTALLATION

Adjusting the projector image

Image height

The projector is equipped with elevator feet for adjusting the image height.

1. Locate the adjustable foot you wish to adjust on the underside of the projector.
2. Rotate the adjustable foot clockwise or counterclockwise to raise or lower the projector.

SETUP AND INSTALLATION

Zoom and focus

4K Standard Model

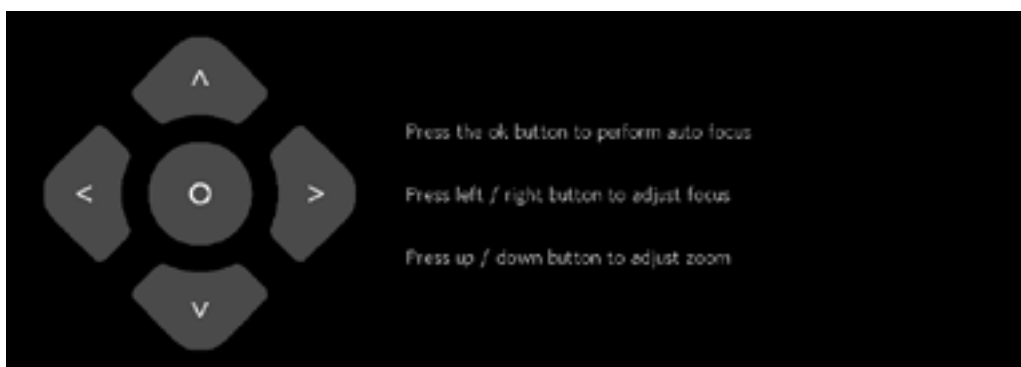

- To adjust the image size, turn the zoom lever clockwise or counterclockwise to increase or decrease the projected image size.
- To adjust the focus, turn the focus ring clockwise or counterclockwise until the image is sharp and legible.

4K Advanced Model

The settings for zoom and focus are located in the OSD menu. Please go to Display > Focus Setting or Display > Zoom Setting to access the instruction menu.

- To adjust the image size, press the \wedge / \vee button repeatedly until the image size meets your needs.
- To adjust the image focus manually, press the $< / >$ button repeatedly until the image is sharp and legible.
- To focus the image automatically, press the \bigcirc (Enter) button.

SETUP AND INSTALLATION

Remote setup

Two AAA size batteries are supplied for the remote control.

1. Remove the battery cover on the back of the remote control.
2. Insert AAA batteries in the battery compartment as illustrated.
3. Replace back cover on remote control.

CAUTION: To ensure safe operation, please observe the following precautions:

- Replacement of a battery with an incorrect type that can defeat a safeguard (AAA size battery type);
- Disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion;
- Leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and
- A battery subjected to extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas.

Note: *The inclusion of the battery and the battery type for the remote control may vary depending on the region.*

SETUP AND INSTALLATION

Effective range

Infra-Red (IR) remote control sensor is located on the top and front sides of the projector. Ensure that the remote control is held at an angle 30 degrees perpendicular to the projector's IR remote control sensor to ensure correct functionality. The distance between the remote control and the sensor should not be longer than 8 meters (26 feet).

- Make sure that there are no obstacles between the remote control and the IR sensor on the projector that might obstruct the infra-red beam.
- Make sure the IR transmitter of the remote control is not being shined by sunlight or fluorescent lamps directly.
- Please keep the remote controller away from fluorescent lamps for over 2 m or the remote controller may malfunction.
- If the remote control is close to Inverter-Type fluorescent lamps, it might become ineffective from time to time.
- If the remote control and the projector are within a very short distance of one another, the remote control might become ineffective.

USING THE PROJECTOR

Powering on/off the projector

Powering on

1. Securely connect the power lead and signal/source cable. When connected, the Power LED will turn red.
2. Turn on the projector by pressing the  button on the back side of the projector or on the remote control.
3. A start up screen will be displayed and the Power LED turns blue.

Note: The first time the projector is turned on, you will be prompted to select the preferred language, projection orientation, and other settings.

Powering off

1. Turn off the projector by pressing the  button on the back side of the projector or on the remote control. The following message will be displayed.

2. Press the  button again to confirm, otherwise the message will disappear after 15 seconds. When you press the  button for the second time, the projector will shut down.
3. When the Power LED turns solid red, this indicates the projector has entered standby mode.
4. Disconnect the power lead from the electrical outlet and the projector.

Note: It is not recommended that the projector is turned on immediately, right after a power off procedure.

USING THE PROJECTOR

Selecting an input source

Turn on the connected source that you want to display on the screen, such as computer, notebook, video player, etc. The projector will automatically detect the source. If multiple sources are connected, press the  button on the remote control to select the desired input.

USING THE PROJECTOR

Menu navigation and features

The projector has multilingual on-screen display menus that allow you to make image adjustments and change a variety of settings. The projector will automatically detect the source.

1. To open the OSD menu, press \equiv on the remote control.
2. When OSD is displayed, press $</>$ to select a main menu.
3. Press \wedge/\vee to select a desired sub menu and then press \bigcirc to view further settings. Adjust the settings by using $\wedge/\vee/</>$.
4. To save and exit, press \equiv or \hookrightarrow . The OSD menu will close and the projector will automatically save the new settings.

USING THE PROJECTOR

OSD menu

Note: The OSD menu tree items and features are subject to models and region. Optoma reserves the right to add or remove items to improve product performance without notice.

Picture Mode

There are several predefined display modes that you can choose from to suit your viewing preference. Each mode has been fine-tuned by our expert colour team to ensure superior colour performance for wide range of content.

- Vivid**
 Selecting this mode balances colour saturation and brightness for a brighter display. Choose this mode for setups with ambient lighting, or where brighter images/presentations are necessary.
- HDR/HLG**
 Decodes and displays High Dynamic Range (HDR)/Hybrid Log Gamma (HLG) content for the deepest blacks, brightest whites, and vivid cinematic color using REC.2020 color gamut. This mode will be automatically enabled if HDR/HLG is set to Auto (and HDR/HLG Content is sent to projector – 4K UHD Blu-ray, 1080p/4K UHD HDR/HLG Games, 4K UHD Streaming Video). While HDR/HLG mode is active, other display modes (Cinema, Reference, etc.) cannot be selected as HDR/HLG delivers color that is highly accurate, exceeding the color performance of the other display modes.
- Cinema**
 Provides the best balance of detail and colors for watching movies.
- Game**
 Optimises your projector for maximum contrast and vivid colours allowing you to see shadow detail when playing video games.
- Reference**
 This mode reproduces colours as close as possible the image the way the movie director intended. Color, color temperature, brightness, contrast and gamma settings are all configured to Rec.709 color gamut. Select this mode for the most accurate colour reproduction when watching movies.
- Bright**
 This mode is suitable for environments where extra-high brightness is required, such as using the projector in well-lit rooms.
- ISF Day/ISF Night/ISF 3D**
 The ISF calibration menu is password protected and only accessible by authorized ISF calibrators. We recommend that setup and calibration be performed by an ISF certified installation technician.

USING THE PROJECTOR

Dynamic Range

- **HDR/HLG**
Configures the High Dynamic Range (HDR)/Hybrid Log Gamma (HLG) setting and its effect when displaying video from 4K Blu-ray players and streaming devices.
 - Auto: Automatically detects HDR/HLG signal.
 - Off: Turns off HDR/HLG Processing. When setting to Off, the projector will NOT decode HDR/HLG content.
- **HDR Brightness**
The projector can automatically adjust the brightness levels of your image according to the input source. You can also manually select a brightness level to display better picture quality. When the value is higher, the image becomes brighter; when the value is lower, the image becomes darker.

Brightness

Adjust the brightness of the image.

Contrast

The contrast controls the degree of difference between the lightest and darkest parts of the picture.

Sharpness

Adjusts the sharpness of the image.

Gamma

Sets up gamma curve type. After the initial setup and fine tuning is completed, utilize the Gamma Adjustment steps to optimize your image output.

- **Film**
For home theater.
- **Graphics**
For PC/Photo source.
- **1.8/2.0/2.2/2.4**
For specific PC/Photo source.

Color Settings

- **Color**
Adjusts the image from black and white to fully saturated color.
- **Tint**
Adjusts the color balance of red and green.

USING THE PROJECTOR

- **Color Temperature**
Selects a color temperature from Warm, Standard, Cool, and Cold.
- **CMS**
Selects the following options:
 - Color: Adjusts the red, green, blue, cyan, yellow, magenta, and white level of the image.
 - Hue: Adjusts the color balance of red and green.
 - Saturation: Adjusts the image from black and white to fully saturated color.
 - Luminance: Adjusts the luminance of the selected color.
 - Reset: Resets all of the settings to the factory defaults.
- **Color Space**
Selects an appropriate color matrix type from the following: Auto, RGB (0-255), RGB (16-235), and YUV.

Wall color

Designed to adjust the colors of the projected image when projecting on to a wall without a screen. There are several predefined modes that you can choose from to suit the colour of your wall. Each mode has been fine-tuned by our expert colour team to ensure superior color performance.

Note: *For accurate color reproduction, we recommend using a screen.*

3D

Note: *This projector is a 3D ready projector with DLP-Link 3D solution.*

Note: *Please ensure that 3D glasses are in use for DLP-Link 3D content before enjoying your video.*

Note: *This projector supports frame sequential (page-flip) 3D via HDMI1/HDMI2 ports.*

Note: *To enable 3D mode, the input frame rate should be set to 60Hz only, lower or higher frame rate is not supported.*

Note: *To reach the best performance, resolution 1920x1080 is recommended, please note that 4K (3840x2160) resolution is not supported in 3D mode.*

- **3D Mode**
Use this option to disable or enable the 3D function.
- **3D Format**
Use this option to select the Frame Sequential format.
- **3D Sync Invert**
Use this option to enable or disable the 3D sync invert function.
- **Reset**
Resets all of the 3D settings to the factory defaults.

Reset

Resets all of the adjustments you've made in the Image menu to the factory defaults.

Projection Orientation

Selects a preferred projection orientation between Front, Rear, Ceiling-Top, and Rear-Top.

USING THE PROJECTOR

Light Source Mode

Selects a light source mode depending on the installation requirements.

Dynamic Black

Enable this feature to automatically adjust the picture brightness for optimum contrast performance.

Low Latency Mode

Enable this feature to reduce response times (input latency) during gaming. The following image settings need to be disabled or set to 0 if you would like to enable low latency mode: 3D, Aspect Ratio, Geometric Correction, Digital Zoom, Image Shift. See below for more information.

- The input lag by signals is described in the following table.
- The values in the table can vary slightly.

Source Timing	Low Latency Mode	Output Timing	Output Resolution	Input Lag
1080p60	On	1080p60Hz	1080p	18.3ms
1080p120	On	1080p120Hz	1080p	9.2ms
1080p240	On	1080p240Hz	1080p	4.6ms
4K60	On	4K60Hz	4K	18.3ms
1080p60	Off	1080p60Hz	1080p	33.8ms
1080p120	Off	1080p120Hz	1080p	17ms
1080p240	Off	1080p240Hz	1080p	8.6ms
4K60	Off	4K60Hz	4K	33.7ms

Aspect Ratio

Select the aspect ratio of the displayed image between the following options:

- **4:3**
This format is for 4:3 input sources.
- **16:9**
This format is for 16:9 input sources, like HDTV and DVD enhanced for Wide screen TV.
- **21:9**
This format is for 21:9 input source, like HDTV and DVD enhanced for Wide screen TV.
- **1:1**
Scales the image with a 1:1 aspect ratio.
- **Native**
This format displays the original image without any scaling.
- **Auto**
Automatically selects the appropriate display format.

USING THE PROJECTOR

Table: Scaling information					
16:9 screen	480i/p	576i/p	1080i/p	720p	PC
4:3	Scale to 2880x2160.

Focus Setting

(4K Advanced Model only)

- Auto Focus**
 Automatically focus the projected image by pressing the  (Enter) button.
- Focus**
 Manually adjusts the image focus by pressing the  /  button.

USING THE PROJECTOR

Zoom Settting

(4K Advanced Model only)

Reduces or magnifies image sizes on the projection screen. Digital Zoom is not the same as optical zoom and can result in degradation of image quality.

- **Optical Zoom**

Adjusts the image size by pressing the \wedge / \vee button.

- **Digital Zoom**

Displays the digital zoom setting menu for adjustments.

Note: Zoom settings are retained on power cycle of the projector.

Geometric Correction

- **Auto Keystone**

(4K Advanced Model only)

Automatically corrects the distorted image when the projector is not aligned with the screen.

Auto Keystone supports the following distances (measured from the front cover of the projector to the wall) and angles:

- 100cm to 250cm: Horizontal and vertical correction up to $\pm 25^\circ$
- 250cm to 320cm: Horizontal and vertical correction up to $\pm 20^\circ$

- **V Keystone**

Adjusts image distortion vertically and make a squarer image. Vertical keystone is used to correct a keystone image shape in which the top and bottom borders of the image are unequal in length. This is intended for use with vertically on-axis applications.

- **H Keystone**

Adjusts image distortion horizontally and make a squarer image. Horizontal keystone is used to correct a keystone image shape in which the left and right borders of the image are unequal in length. This is intended for use with horizontally on-axis applications.

- **Four Corner Adjustment**

This setting allows adjustments for each corner to make a square image when the projection surface is not level.

- **5 x 3 Warp**

Adjusts the image to align with the border of the projection surface (screen) or to eliminate image distortion (caused by an uneven surface).

- **Reset**

Resets all the settings in the Geometric Correction menu to the factory defaults.

USING THE PROJECTOR

Digital Zoom

(4K Standard Model only)

Displays the digital zoom setting menu for adjustments.

Note: *Zoom settings are retained on power cycle of the projector.*

Image Shift

Adjusts the projected image position horizontally (H) or vertically (V).

Reset

Resets all the settings in the Display menu to the factory defaults.

The following settings will still remain: Projection Orientation, Light Source Mode, Geometric Correction, Image Shift.

USING THE PROJECTOR

Test Pattern

Selects a suitable test pattern.

Language

Sets the language for the OSD menus.

Menu Settings

- **Menu Location**
Sets the OSD menu position.

USING THE PROJECTOR

- **Menu Timer**
Sets the duration the OSD menu stays visible on the screen.
- **Information Hide**
Enable this function to hide the information message.

High Altitude

When “On” is selected, the fans will spin faster. This feature is useful in high altitude areas where the air is thin.

Power Settings

- **Direct Power On**
Choose “On” to activate Direct Power mode. The projector will automatically power on when AC power is supplied, without pressing the “Power” key on the projector or remote control.
- **Signal Power On**
Choose “On” to activate Signal Power mode. The projector will automatically power on when a signal is detected, without pressing the “Power” key on the projector or remote control.
Note: *This function is applicable with HDMI source.*
- **Auto Power Off (min.)**
Sets the countdown timer interval by 1-minute increments. The countdown timer will start when there is no signal being sent to the projector. The projector will automatically power off when the countdown finishes.
Note: *Adjusting power-related functions may increase energy consumption.*
- **Sleep Timer (min.)**
Sets the countdown timer interval by 30-minute increments. The countdown timer will start, with or without a signal being sent to the projector. The projector will automatically power off when the countdown finishes.
Note: *The Sleep Timer is reset every time the projector is powered off.*
- **USB-A power**
(4K Standard Model only)
 - Auto: When Bright Mode is selected, the USB-A power supply will automatically turn off. If Bright Mode is not in use, the USB-A port supplies power normally.
 - On: When Bright Mode is selected, the USB-A power supply will remain active but with reduced wattage and brightness.
 - Off: The USB-A power supply will always remain off.

USING THE PROJECTOR

Security

- **Security**
Enable this function to prompt for a password before using the projector.
 - On: Choose “On” to use security verification when the turning on the projector.
 - Off: Choose “Off” to be able to switch on the projector without password verification.

Note: *The default password is 1234.*
- **Security Timer**
Select the time (Month/Day/Hour) function to set the number of hours the projector can be used. Once this time has elapsed you will be requested to enter your password again.
- **Change Password**
Use to set or modify the password that is prompted when turning the projector on.

Startup Logo

- **Logo**
Use this function to set the desired startup screen. If changes are made, they will take effect the next time the projector is powered on.
 - Default: Displays the default startup screen.
 - Neutral: Logo is not displayed on the startup screen.

Background Color

Use this function to display a blue, red, green, grey color, none, or logo screen when no signal is available.

Note: *If the background color is set to “None”, then the background color is black.*

Reset

- **Reset OSD**
Resets all the settings in the Device Setup menu to their factory defaults.
The following settings will still remain: Language, Security.
- **Reset All Settings**
Resets all the settings to the factory defaults.
The following settings will still remain: Projection Orientation, Audio Output, Digital Output Format.

USING THE PROJECTOR

4. Main menu: Input Settings

Main Menu	Sub Menu	Sub Menu 2	Sub Menu 3
Input Settings	Auto Source (4K Advanced Model only)		Off
			On
	Auto Input Switch (4K Advanced Model only)		Off
			On

			On
		Power On Link	Mutual
			PJ --> Device
			Device --> PJ
		Power Off Link	Mutual
			PJ --> Device
			Device --> PJ
	Reset		No
			Yes

Auto Source

(4K Advanced Model only)

Choose this option to let the projector automatically find an available input source.

Auto Input Switch

(4K Advanced Model only)

When an HDMI input signal is detected, the projector will automatically switch to it as the input source.

HDMI CEC Settings

Note: When you connect HDMI CEC-compatible devices to the projector with HDMI cables, you can control them on the same power on or power off status using the HDMI Link control feature in the projector's OSD. This lets one device or multiple devices in a group power on or power off via HDMI Link Feature in a typical configuration, your DVD player may be connected to the projector through an amplifier or home theater system.

- **HDMI Link**
Enables/Disables the HDMI Link function.

USING THE PROJECTOR

- **Power On Link**
Sets the CEC power command.
 - Mutual: Both the projector and CEC device will be turned on simultaneously.
 - PJ → Device: The CEC device will be turned on only after the projector is switched on.
 - Device → PJ: The projector will be switched on only after the CEC device is turned on.
- **Power Off Link**
Sets the CEC power command.
 - Mutual: Both the projector and CEC device will be turned off simultaneously.
 - PJ → Device: The CEC device will be turned off only after the projector is switched off.
 - Device → PJ: The projector will be switched off only after the CEC device is turned off.

Reset

Resets all the settings in the Input Settings menu to the factory defaults.

USING THE PROJECTOR

5. Main menu: Audio

Main Menu	Sub Menu	Sub Menu 2	Sub Menu 3
Audio	Volume	0 - 100	
	Mute	Off	
		On	
	Audio Output (4K Advanced Model only)	Internal Speaker	
		Digital Output	
	Digital Output Format (4K Advanced Model only)	Auto	
		LPCM	
		Multi-Channel	
		Multi-Channel +	
	Reset		

Volume

Adjusts the volume level.

Mute

Use this option to temporarily turn off the sound.

Note: “Mute” function affects both internal and external speaker volume.

Audio Output

(4K Advanced Model only)
Sets the audio output source.

Digital Output Format

(4K Advanced Model only)
Sets the digital output format.

- **Auto**
Automatically selects a suitable output format for the audio system.
- **LPCM**
Supports 2-channel audio output.
- **Multi-Channel**
Supports 5.1-channel audio output.
- **Multi-Channel+**
Supports Dolby Atmos audio output.

USING THE PROJECTOR

Reset

Resets all the settings in the Audio menu to the factory defaults.

USING THE PROJECTOR

Remote Settings

This menu allows you to customize the three user buttons (\mathcal{P}_1 , \mathcal{P}_2 , \mathcal{P}_3) on the remote control. You can assign a menu function to each user button for quick access later.

To customize the user button:

1. Go to the Control > Remote Settings menu.
2. Select a user button (User 1, User 2, or User 3) to assign a menu function to it.
3. Press \lt / \gt to select a desired function.
4. Once the function is selected, press \hookrightarrow to return to the previous menu.
5. Repeat step 1-4 to assign functions to the other user buttons.

Once User 1, User 2, and User 3 have been assigned the desired menu functions, pressing the corresponding user buttons (\mathcal{P}_1 , \mathcal{P}_2 , \mathcal{P}_3) on the remote control will display the memus that have been set.

Reset

Resets all the settings in the Control menu to the factory defaults.

USING THE PROJECTOR

ADDITIONAL INFORMATION

Projector dimensions and ceiling mount installation

1. To prevent damage to your projector, please use the Optoma ceiling mount kit.
2. If you wish to use a third party ceiling mount kit, please ensure the screws used to attach a mount to the projector meet the following specifications:
 - Screw type: M4*10mm
 - Minimum screw length: 10mm

Note: Please note that damage resulting from incorrect installation will void the warranty.

Warning:

- If you buy a ceiling mount from another company, please be sure to use the correct screw size. Screw size will vary depending on the thickness of the mounting plate.
- Be sure to keep at least 10 cm gap between the ceiling and the bottom of the projector.
- Avoid installing the projector near a heat source.

ADDITIONAL INFORMATION

Troubleshooting

If you experience a problem with your projector, please refer to the following information. If the problem persists, please contact your local reseller or service center.

Image problems

-  *No image appears on-screen*
- Ensure all the cables and power connections are correctly and securely connected as described in the "Installation" section.
 - Ensure that the pins of the connectors are not crooked or broken.
 - Ensure that the "Mute" feature is not turned on.
-  *Image is out of focus*
- Turn the focus ring clockwise or counterclockwise until the image becomes sharp and clear. (Please see page 17).
 - Make sure the projection screen is between the required distance from the projector. (Please refer to pages 44~45).
-  *The image is stretched when displaying a 16:9 DVD title*
- When you play an anamorphic DVD or a 16:9 DVD, the projector will display the best image in 16:9 format.
 - If you play a 4:3 format DVD title, please change the format as 4:3 in the projector's OSD.
 - Please set up the display format as 16:9 (wide) aspect ratio on your DVD player.
-  *Image is too small or too large*
- Turn the zoom lever clockwise or counterclockwise to increase or decrease the projected image size. (Please see page 17).
 - Move the projector closer to or farther from the screen.
 - Press  (Menu) on the remote control, go to "Display > Aspect Ratio". Try the different settings.
-  *Image has slanted sides*
- If possible, reposition the projector so that it is centered on the screen and below the bottom of the screen.
-  *Image is reversed*
- Select "Display > Projection Orientation" from the OSD and adjust the projection direction.

ADDITIONAL INFORMATION

Other problems

The projector stops responding to all controls

- If possible, turn off the projector, then unplug the power cord and wait at least 20 seconds before reconnecting power.

Remote control problems

If the remote control does not work

- Check the operating angle of the remote control is pointed within $\pm 30^\circ$ to the IR receiver on the projector.
- Make sure there are not any obstructions between the remote control and the projector. Move to within 8 m (26 ft) of the projector.
- Make sure batteries are inserted correctly.
- Replace batteries if they are exhausted.

ADDITIONAL INFORMATION

Warning indicator

When the warning indicators (see below) light up or flash, the projector will automatically shut down:

- Thermal error: The LED indicator lights red and flashes blue.
- Fan error: The LED indicator flashes red and lights blue.
- Light error: The LED indicator flashes blue.

Unplug the power cord from the projector, wait for 30 seconds and try again. If the warning indicator lights up or flashes, please contact your nearest service center for assistance.
