

The *Ultimate* Golf Sim Experience

Simulate the most realistic golf experience with Optoma's expanded golf simulator product line - Built for short-throw placement, low-lag response, and golf-optimized picture performance.

Tee Off Anywhere, Anytime!

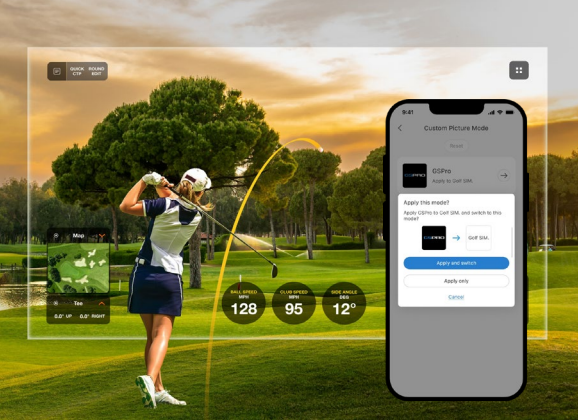

See every swing in stunning detail.

Golf Sim. Color Mode for Realistic Courses

The dedicated Golf Sim Mode enhances color tuning to bring brighter blue skies, deeper shadows, and natural green grass tones - making every course look vivid and true to life.

Built for performance. Designed for golf.

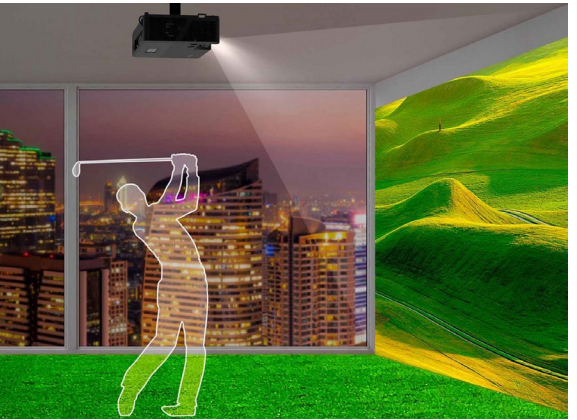

Smart Control App*

Optoma Smart Control mobile app provides purpose-built display tuning for third-party golf simulation software such as GSPro, delivering a more realistic, visually accurate, and immersive experience.

*Functionality varies by model.

Compact short throw, powerful impact.

Instant auto-alignment with Smart Fit

Smart Fit uses your smartphone's camera to detect the screen frame and automatically correct the image alignment, significantly reducing installation effort.

Transform any space into the **ultimate golf experience** with Optoma's high-performance simulator visual solutions. Whether you're practicing at home, setting up a commercial facility, or enhancing customer experiences in hospitality and retail, Optoma brings championship-level golf simulation to any environment. Check out our carefully tailored golf product line!
