

HQScene200

Ultra-Wide Display Controller

Optoma's HQScene200 dvLED controller provides displays with added capabilities such as multi-source tiling, 4K compatibility, signal synchronization and more.

Customize your space with multi-source tiling technology for seamless, expandable displays that foster creativity and teamwork.

HQScene200 supports 4K input and delivers crisp 1080p visuals with exceptional clarity.

Powered by OSS and OMSC for smart, centralized management across various settings.

The 32:9 ultra-wide screen integrates with Microsoft Teams Rooms, bringing participants, content, and chat together with flexible layouts and customizable viewing modes for inclusive meetings.
