Optoma

Optoma Management Suite Cloud

OMSC - Advanced cloud based remote management solution for audio visual displays

- **Peace of mind - Monitor, diagnose and control your audio visual displays worldwide via a single platform**

- **Real-time monitoring and alerts - 24/7 monitoring and alerts across all devices for an immediate response to issues before they escalate**

- **Scheduling and broadcast - Distribute emergency messages and alerts to all displays across the network and create custom playlists with the built-in scheduler**

- **Energy-efficient and cost-saving - Reduce energy usage on any device by scheduling shutdown of displays after work hours or immediate shutdown for emergencies**

Optoma Management Suite Cloud (OMSC)™ is an intuitive display management cloud based solution, designed to streamline operations by monitoring, diagnosing and controlling audio visual displays via a local area network and wireless connectivity from a single platform
